PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/670,071

Applicant(s)

MYERS ET AL.

Examiner

Arun Williams

Art Unit

2838

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 23 September 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1,3-7,9-11,13, 15, and 16 rejected under 35 U.S.C. 102(b) as being anticipated by Morita et al, (Morita), USPAT 5,652,499.**

As for claims 1,5,9, and 13, Morita discloses and shows in Fig. 1 a battery powered device configured to receive auxiliary electric power applied between a first terminal and a second terminal; comprising: the first terminal(also pin)(8), wherein it is a male contact that receives a female contact (plug of 9), positioned adjacent to a cavity sized (2A) to receive a battery; the first terminal configured to electrically contact an electrode (probes on the 2A) of the battery when the battery is located within the cavity; the first terminal also configured to electrically contact a first lead of an auxiliary power cord plug when a housing of the plug is located within the cavity, thus is implicit by the circuitry configuration of the prior art; the second (this lies within 8)terminal configured to electrically contact a second lead of the plug when the housing of the plug is located within the cavity (col.5, lines 37-55).

As for claims 3,4,6,7,10,11,15, and 16, Morita shows in Fig. 13, a battery stop (132A) located adjacent to the first terminal and configured to prevent the battery from damaging the first terminal through over-insertion of the battery into the cavity, wherein battery stop comprises a brow (substantial notch on 132A) on a wall adjacent to the first terminal (col.9-10, lines 61-12)

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 2838

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Yang, USPAT 6,563,713 in view of Larsson, USPAT 4,964,851.

As for claims 1,5,9, and 13, Yang discloses and shows in Fig. 7 a battery powered device configured to receive auxiliary electric power applied between a first terminal and a second terminal; comprising: the first terminal(also pin) (terminal in 11) positioned adjacent to a cavity (11) sized to receive a battery; the first terminal configured to electrically contact an electrode (721) of the battery when the battery is located within the cavity; the first terminal also configured to electrically contact a first lead of an auxiliary power cord plug when a housing(3) of the plug is located within the cavity; the second terminal(5) configured to electrically contact a second lead of the plug (plug from A or B) when the housing of the plug is located within the cavity (col.2, lines 23-49).

As for claims 3,4,6,7,10,11,15, and 16 Yang discloses and shows in Fig. 7 a battery stop (notch in 11) located adjacent to the first terminal and configured to prevent the battery from damaging the first terminal through over-insertion of the battery into the cavity and the battery stop comprises a brow (surrounding structure in 11) on a wall adjacent to the first terminal.

As for claims 2,8,12, and 14, Yang differs from the claimed invention because he does not explicitly disclose a breast pump. Larsson discloses and shows in Fig. 1 a battery power device being a breast pump (col.2, lines 11-44). Larsson is evidence that

Art Unit: 2838

ordinary skill in the art would find a reason, suggestion or motivation to use a breast pump.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify Yang by using breast pump for advantages such as achieving good pressure regulation (col.1, lines 35-36), as taught by Larsson

8. Claims 2,8,12, and 14 rejected under 35 U.S.C. 103(a) as being unpatentable over Morita in view of Larsson, USPAT 4,964,851.

As for claims 2,8,12, and 14, Morita differs from the claimed invention because he does not explicitly disclose a breast pump. Larsson discloses and shows in Fig. 1 a battery power device being a breast pump (col.2, lines 11-44). Larsson is evidence that ordinary skill in the art would find a reason, suggestion or motivation to use a breast pump.

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify Morita by using breast pump for advantages such as achieving good pressure regulation (col.1, lines 35-36), as taught by Larsson.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arun Williams whose telephone number is 571-272-9765. The examiner can normally be reached on Mon - Thrus 6:30am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Akm Ullah can be reached on 571-272-2361. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
